EDUCATION

IES College of Technology

B.Tech - CGPA - 7.69

2023 – 2027

Bhopal, Madhya Pradesh

Core Concepts

- Data Structures & Algorithms
- Object-Oriented Programming
- Web Development
- Operating System
- Database Management System
- Software Engineering

PROJECTS

GS-orderCapture 🔗 | [Java](#), [Spring Boot](#), [JWT](#), [Razorpay](#), [React](#), [Tailwind CSS](#), [ShadCN](#), [Redux](#), [Axios](#)

- Developed a comprehensive Point of Sale platform aimed at streamlining and automating retail operations. The system efficiently handles core business functionalities including billing, inventory management, order processing, and user role administration, ensuring seamless daily store operations. Additionally, it provides real-time sales insights and analytical reports, enabling businesses to monitor performance and make informed, data-driven decisions. .
- [Live site here](#)

SmartCity 🔗 | [React.js](#)

- SmartCity Web Application (Frontend) – Built a responsive React.js interface that enables users to report city issues such as garbage, road damage, and electricity faults by capturing or uploading photos and adding location details. Designed an intuitive, mobile-friendly UI/UX, prepared for seamless backend integration..
